## Classic Quality

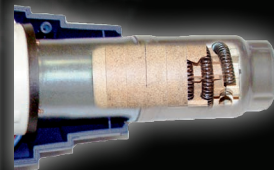

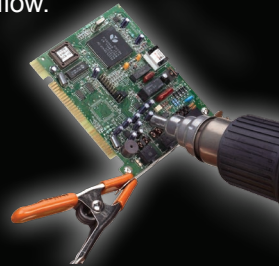

**HL 1910 E**  
Variable Temperature  
Electronic Heat Gun

Variable temperature: 120° F - 1100° F  
3 Stage airflow: cool / 10.6 / 17.6 CFM  
1500 Watts

**Electronic  
Thermocouple Control**

Microprocessor measures and regulates heat produced, preventing heat back-up even with restricted airflow. Extends life of tool and enables use of specialty reduction nozzles.

**DuraTherm™  
Heating Element**

Ceramic Encapsulated Heating System is unsurpassed for even heat and long life. Coils are wound through a series of stacked ceramic disks achieving a "honey-comb" effect that fully encapsulates and supports.

Made in E.U.
